

Progress Report 2

Project Name	<i>Wi-Fi Communication platform</i>										
Index No	<i>140323F</i>										
Weekly Report No	<i>Report 2</i>										
Reporting period	<i>17-04-17 to 23-04-17</i>										
Section 1: Activities and Progress											
1.1 Implementation/ development progress											
<table border="1"><thead><tr><th>Expected</th><th>Progress</th></tr></thead><tbody><tr><td>Finish implementing contacts handling</td><td>Part of it has done. Will be finished in next week</td></tr><tr><td>Finish implementing file sharing functionalities</td><td>Finished</td></tr><tr><td>Implementing security part</td><td>Finished</td></tr><tr><td>Create testing plan</td><td>Started. Will be done in next week</td></tr></tbody></table>		Expected	Progress	Finish implementing contacts handling	Part of it has done. Will be finished in next week	Finish implementing file sharing functionalities	Finished	Implementing security part	Finished	Create testing plan	Started. Will be done in next week
Expected	Progress										
Finish implementing contacts handling	Part of it has done. Will be finished in next week										
Finish implementing file sharing functionalities	Finished										
Implementing security part	Finished										
Create testing plan	Started. Will be done in next week										
1.2 Testing progress											
<p>Testing plan has to be finished.</p> <p>Unit testing for control message separator has done.</p> <p>Prototype testing for file sharing functionality has done.</p>											
1.3 Deviations from proposed architecture and design (if any)											
<p>Proposed architecture didn't contain a control message separating part and it has implemented for application level commands sharing.</p>											
Section 2: Risks, Issues and Challenges											
<p>It is very hard to test the application functionalities in one pc. Testing is done using local server in one pc. The main Challenge is testing real network problems.</p>											
Section 3: Next Steps											
<ul style="list-style-type: none">• Finalizing and integrate the functionalities into UI.• Testing• Finish contacts handling
